INTERMOUNTAIN POWER PROJECT

A DEVELOPMENT OF INTERMOUNTAIN POWER AGENCY

January 10, 1992

Babcock & Wilcox
P. O. Box 351
Barberton, Ohio 44203

Attention Mr. C. A. Palmberg

Gentlemen:

Steam Generator Contract Specifications 2010

Thank you for your letter dated December 6, 1991 which provided your quote for the removal of the existing 48 burners and replacement with 48 modified dual register burners for each unit at Intermountain Generating Station.

This letter is to inform you that we have reviewed and decided to accept your proposal for the installation of the Unit 1 modified dual register burners only, during the Spring 1992 Outage. At this time, we are continuing assessing the Unit 2 burners and there is no projection for replacement. The Unit 1 Spring Outage is scheduled to start on April 13, 1992.

With a copy of this letter, the Site Construction Manager will issue a Field Instruction to Babcock & Wilcox Construction Company for the above work. Also, the Site Construction Manager will issue a Change Order documenting this agreement.
